KEY BENEFITS

MAY HELP:

INCREASE Omega-3 level in eggs, yields 325-250 mg per egg

SUPPORT brilliant, high-quality plumage

STRENGTHEN egg shells

IMPROVE laying rates, flock health, and spent hen value

PRESERVE egg flavor, aroma, and nutritional value

NATURAL without artificial preservatives

GMO-FREE

NATURALLY OCCURRING amino acids — valuable protein building blocks

FORMULATED with stabilized, ground, whole flaxseed high in Omega-3, using proprietary technology to maintain full nutritional value guaranteed for 18 months

AVAILABLE SIZES: 4.5 lb. pouch, 20 lb. bag and 50 lb. bag

CUSTOMER TESTIMONIALS

AMAZED BY THE RESULTS

“I have been feeding Omega Ultra Egg® to my home flock of about 30 hens for just over a month now and I am amazed by the results. The hens’ feathers look brighter and have more sheen, and their egg shells are stronger and more durable. The eggs taste even better than before, and they were already good. I am happy knowing that my family and my customers are eating Omega-3 enriched eggs. Omega Ultra Egg® is easy to use — you just top-dress the feed you are currently using. There is no waste because the hens love the taste and eat every bit of it up.”

EASY TO USE – CHICKENS LOVE THE TASTE!

“The Omega Ultra Egg® is easy to use. You just measure out the right amount (instructions right on the bag) and sprinkle it over the feed. The chickens love the taste of it. I had no problem getting them to eat it. Their feathers are nice and glossy, their combs are bright red. Their egg yolks are a brilliant orange. I also think the egg color themselves have gotten deeper and richer due to the Omega Ultra Egg® in their diet. The blues are bluer, the browns a deeper brown and the creams creamier. I also notice that their shells are appreciably thicker. I even dropped an egg in the run the other day and it actually bounced!”
