MAXIMIZED antioxidant defense helps prevent debilitating disease

PERFORMANCE of five powerful antioxidants — Lignans, Catechins, Quercetin, Taxifolin, Tocopherols

ALTERNATIVE for psyllium which may prevent sand colic

GMO-FREE

FORMULATED with stabilized, ground flaxseed high in Omega-3 using proprietary technology to maintain nutritional value for 18 months

AVAILABLE SIZE: 50 lb. bag

BETTER THAN THE COMPETITION

- Omega Antioxidant™-Senior Care stabilized ground flaxseed base is blended with a special variety of high-antioxidant, ground grain sorghum — a rich source of polyphenol (plant-based), anti-oxidizing power. Polyphenols help counteract oxidative stress induced by exercise, pregnancy, aging, or illness.
- Omega Antioxidant™-Senior Care special synergistic variety of natural antioxidants contain more polyphenol anti-oxidizing power than chemical-based antioxidant ingredients ensuring a degree of coverage not provided by basic vitamins E and C. In fact, they act to regenerate the vitamin E in the formula/diet,

giving it double-acting power. Scientific studies indicate that antioxidants are most effective and safe when combined in a team effort.

- Omega Antioxidant™-Senior Care's five phyto-nutrients — Lignans, Catechins, Quercetin, Taxifolin, and Tocopherols — are a smart investment to neutralize the harmful free radicals produced in your horse's body.
- "Brans from sorghum (a grain), especially brown sorghum, have been found to have high levels of natural antioxidants of the polyphenol type, same as those found in berries and grapes. The addition of high-quality ground-stabilized flax in Omega Antioxidant™ also provides a good source of the antioxidant Omega-3 fatty acids. Best tried as a supplemental source of natural plant antioxidants and Omega-3 essential fatty acids for horses without access to fresh grass. Additional antioxidant support of any inflammatory/allergic problem."**

CUSTOMER TESTIMONIALS

GLOSSY COAT, GOOD FEET, HAPPY ATTITUDE

"I highly recommend Omega Antioxidant™-Senior Care! I tried all different kinds of supplements on the market for two years with no success. A fellow boarder suggested I try the Omega Antioxidant™-Senior Care she was feeding her upper level dressage horse. Well, I have been feeding it to Gryphon daily for the last five years, and the picture says it all — Gryphon has a glossy coat, good feet and best of all a happy energetic attitude!"

Gryphon

- Linda Kipperman, Bow NH

INTEGRAL PART OF TOTAL HEALTH

"My daughter competes in the Junior Hunters with her Belgian Warmblood, Valen's Prophecy. Valen had a pretty severe hoof abscess where they had to cut away a portion of his hoof. Omega Antioxidant™-Senior Care has helped grow a strong, healthy hoof quickly, not to mention the amazing shiny coat and tail. Valen is black and his coat looks like velvet. People stop and ask us all the time how we get our horse so shiny! Thank you for this amazing product!"
